TRANSPORTATION LIBRARY

## INDEX TO VOLUME 14

MARCH 1933-FEBRUARY 1934

## CHRONOLOGICAL LIST OF ARTICLES

MARCH 1933:	Page	NOVEMBER 1933:	Page
TAR SURFACE TREATMENT OF LOW-COST ROADS.....	1	STRENGTH TESTS OF CAST-IRON CULVERT PIPE.....	157
<b>APRIL 1933:</b>			
THE WISCONSIN FINANCIAL SURVEY.....	21	<b>DECEMBER 1933:</b>	
<b>MAY 1933:</b>		LABORATORY TESTS ASSIST IN THE SELECTION OF MATERIALS SUITABLE FOR USE IN MUD JACK OPERATIONS.....	181
THE ILLINOIS FINANCIAL SURVEY.....	37	ANALYTICAL TOOLS FOR JUDGING RESULTS OF STRUCTURAL TESTS OF CONCRETE PAVEMENTS.....	185
STATE GASOLINE TAXES, 1932.....	52	AN IMPROVED RECORDING STRAIN GAGE.....	189
MOTOR-VEHICLE REGISTRATIONS, 1932.....	54	<b>JANUARY 1934:</b>	
MOTOR-VEHICLE RECEIPTS, 1932.....	55	STABILITY EXPERIMENTS ON ASPHALTIC PAVING MIXTURES.....	197
PRICE INDICES SHOW TREND OF HIGHWAY CONSTRUCTION COSTS.....	56	RELATIVE VISCOSITIES OF LIQUID ASPHALTIC ROAD MATERIALS AT VARIOUS TEST TEMPERATURES.....	212
<b>JUNE 1933:</b>		A LABORATORY TRAFFIC TEST FOR LOW-COST ROAD TYPES.....	219
THE MICHIGAN FINANCIAL SURVEY.....	57	<b>FEBRUARY 1934:</b>	
<b>JULY 1933:</b>		A TIME STUDY OF TRAFFIC FLOW ON THE NEW JERSEY HIGH-LEVEL VIADUCT.....	223
COTTON MATS FOR CURING CONCRETE.....	73	RESULTS OF STUDIES ON ROGUE RIVER BRIDGE REPORTED.....	232
AN INDEX OF THE COST OF HIGHWAY CONSTRUCTION.....	81	THE EFFECT OF CONTROL METHODS ON TRAFFIC FLOW.....	233
<b>AUGUST 1933:</b>		AN IMPROVED METHOD OF MEASURING SPEED OF TRAFFIC.....	242
COMMENTS ON THE HYDROMETER METHOD OF MECHANICAL ANALYSIS.....	93		
EFFECT OF CURING CONDITIONS ON THE STRENGTH OF CEMENT MORTAR.....	106		
<b>SEPTEMBER 1933:</b>			
THE COMPARATIVE VISIBILITY OF STANDARD LUMINOUS AND NONLUMINOUS HIGHWAY SIGNS.....	109		
<b>OCTOBER 1933:</b>			
THE EFFECT OF VIBRATION AND DELAYED FINISHING ON PAVEMENT SLABS.....	129		

## LIST OF AUTHORS

EMMONS, W. J.	PAULS, J. T.
HARRISON, J. L.	SHIPPEY, K. F.
HOLMES, E. H.	TELLER, L. W.
JACKSON, F. H.	THOREEN, R. C.
KELLERMANN, W. F.	TUTTLE, LAWRENCE S.
KELLEY, E. F.	WESTERGAARD, H. M.
LEWIS, R. H.	WINTERMYER, A. M.
MILLS, F. W.	WOOLF, D. O.

# INDEX TO PUBLIC ROADS, VOLUME 14

A	Page
Abrasion:	
of soil surfaces, resistance to as affected by sand content	182
<i>see also</i> Stability—Wear tests.	
Absorption, <i>see</i> Absorption tests—Heat absorption—Liquid limit of soils—Moisture content.	
Absorption tests:	
of aggregates used in test concretes	129
of concretes finished by—	
Johnson (delayed finishing) method	130
vibration method	130, 131, 133, 134, 143-145
Accounting methods, data from financial surveys	21, 37, 39, 45, 57, 59
Administration, administration and costs of—	
highway administration and costs of	21, 25, 27, 28, 37, 38, 44-46, 48, 49, 57-59, 68-70
tax administration, public funds administration, and costs of	21, 37, 38, 41, 43, 45, 57-60
<i>see also</i> Collection and administration costs.	
Admixtures, use:	
in base courses of tar surface treated roads	2, 3, 7, 16, 20
in mud jack pastes	181, 182, 184, 194
Age—strength relations:	
of cement mortar as affected by curing conditions	105-108
of concrete, <i>see</i> Compressive strength—Flexural strength.	
Aggregates:	
crushing in mats of tar surface treated roads	12, 13
in soil mixtures	13, 14
segregation in concrete	129, 142, 151
types, gradings, and application methods used in tar surface treatment of roads	1-3, 6-8, 10-13, 17, 20
types, gradings, and proportions as affecting quality of concrete finished by vibration and Johnson methods	129-154
stability of asphaltic paving mixtures	198-211, 218
Aids, governmental, <i>see</i> Federal-aid roads—Grants—Public works road construction—State aid funds.	
Ammonium hydroxide as soil deflocculating agent	95
Analyses, <i>see</i> names of materials, <i>also</i> Mechanical analyses—Soil constants—Soil tests.	
Analytical tools for judging results of structural tests of concrete pavements, a	185-188
Apparatus, <i>see</i> names of kinds of apparatus; <i>also</i> names of tests and of processes in which apparatus is used.	
Asphaltic paving mixtures, <i>see</i> Bituminous roads, bituminous paving mixtures.	
Asphalts, asphaltic road materials:	
blown asphalt and steam refined asphalt—analyses	200
comparative effects upon mixtures	201-211, 218
liquid asphaltic materials, relative viscosities at various test temperatures, a	212-218
semisolid asphaltic materials, tests for control of consistency of	217, 218
Assessments, special	25, 33, 38, 40, 44, 45, 50, 57, 58, 60-61, 66, 70
Automobiles, <i>see</i> Motor vehicles.	
B	Page
Bases, base courses:	
of Mount Vernon Memorial Highway	10
of tar surface treated roads	1-20
of thin wearing courses, soils suitable for	16, 20
Beaker method of mechanical analysis of soils	102-105
Bearing tests of culvert pipe (cast-iron)	157-178
Bending moments in culvert pipe (cast-iron), data from strength tests	160-162, 167, 170, 171
Bending tests of strips from culvert pipe (cast-iron)	169-178
Bibliography of soil research	105
Bid-price data for road construction	85, 86, 88-91
Binding materials, binders:	
binder course as affecting stability of asphaltic paving mixtures	200, 201
binding properties of soils in various soil groups	16, 20
bituminous binders	1, 2, 5-13, 16, 17, 197-211, 215, 218
clay binders	2, 10, 13-20
Bitumen contents:	
of asphaltic paving mixtures as affecting stability	199-211, 218
of mats and primed bases of tar surface treated roads, bitumen extracted	11, 12

Page	Page
Bituminous coatings as concrete curing agents	73-78
Bituminous materials:	
analyses of materials used in—	
experimental paving mixtures	200
tar surface treatment of roads	8, 10
cold application in surface treatment of roads	1, 2, 5, 8, 11-13, 17
for retread and oiled road mix construction	212, 213, 215
hot application in surface treatment of roads	1, 2, 6-8, 11-13, 17, 212, 215-218
liquid asphaltic materials, viscosity tests of	212-218
percentage and consistency, effect on mixtures with one type and grading of aggregate, investigation of	219
Bituminous roads, bituminous paving mixtures:	
analyses of experimental asphaltic mixtures	199, 201, 210
bituminous concrete roads	
place in "composite mile", cost index data	84-87
stability experiments	197-211, 218
State highway mileages, 1923-31	87
bituminous macadam roads—	
in Illinois	38
in Wisconsin	22
place in "composite mile", cost index data	84-87
State highway mileages, 1923-31	87
roughness indicator readings	10
stability tests—	
of asphaltic mixtures	197-211, 218
traffic test track for	219
Bituminous surface treatment of roads:	
consistency requirements for materials	215-218
tar treatment of low-cost roads	1-20
Bond:	
between coarse aggregate particles in asphaltic mixtures, loosening under traffic	199
in base courses and surfaces of tar surface treated roads	1-20
in macadam roads as affected by character of subgrade soil	16
lack of bond between surfaces and bases of bituminous roads, effects	1, 2, 200, 201
Bonded indebtedness, <i>see</i> Bonds—Debts.	
Bonds:	
drainage bonds (Michigan)	63
highway bonds—	
data from financial surveys	25-29, 31, 35, 38, 39, 43-45, 49, 50, 56, 58, 63, 64
State funds for—	
from gasoline tax receipts, 1932	52, 53
from motor vehicle receipts, 1932	55
Bouyous hydrometer method of mechanical analysis of soils	93-105
Brick and other block pavements:	
place in "composite mile", cost index data	84-87
State highway mileages, 1923-31	87
Bridges:	
concrete arch bridges, Freyssinet construction method	232
drawbridges, effect upon traffic flow	223-228, 230, 231
traffic flow on (New Jersey study)	223-232
width, as affecting costs of highway construction	91
Brownian movement of soil particles	97, 98
Burlap cover for concrete curing, comparison with cotton mats	73-80, 92
Business purposes, motor vehicle use for (Wisconsin)	35, 36
Buttons, reflector, for highway signs	109, 119-128
C	Page
Calibrating device, calibration data, for strain gages, etc.	192-194
Capillary tension in soil during moisture evaporation	182, 183
Capillary water:	
effect on bituminous mixtures, proposed investigation	219
in soils	2, 14-17, 182, 183
Cement:	
as admixture in mud jack pastes	181-184, 194
color, effect on heat absorption by concrete pavements	74-77
high-early-strength cement, strength as affected by curing conditions	106-108
solution in storage water as affecting strength of cement mortar specimens	106, 107
Cement factors in various test mortars and concretes	78, 106, 130, 135, 145, 147-151, 154
Cement mortar, strength as affected by curing conditions	106-108

Page	Page
Chauffeurs, licenses and permits of	41, 54, 55, 60
Circular test roadway	197, 198
Circular test track for laboratory use	219
City driving conditions, relation to visibility of highway signs	122, 128
City-owned motor vehicles (numbers, tax revenues from, travel by):	
in Illinois	37-44, 46-51
in Michigan	58-62, 64, 66-72
in Wisconsin	21-25, 27, 29-36
City property, <i>see</i> Assessments, special—Valuation taxes—Valuations.	
City streets, <i>see</i> Federal-aid roads—Public works road construction—Streets.	
City taxpayers, contributions to highway funds (three States, 1930)	23-29, 31, 33-35, 37-51, 56-72
Clay contents of soils:	
as affecting suitability of soils for mud jack mixtures	182-184, 194
determination by hydrometer and other sedimentation methods	93-105
effects (general)	2, 14-16
percentages allowable in base courses of tar surface treated roads	2, 20
plastic properties, reduction of, recommended research	2
reduction by admixtures	2, 3, 7, 16, 20
relation to soil constants	15-19
values for various soils	4, 5, 18, 19, 100, 104, 105, 183, 184
<i>see also</i> Binding materials, binders.	
Climatic conditions, weather conditions, as affecting:	
consistency of concrete mixed under field conditions	141, 142
soil behavior	2, 16, 184
stability of asphaltic paving mixtures	197, 205, 206, 209-211, 218
tar treated road surfaces	1-3, 6, 7, 11
visibility of highway signs	110, 123, 127, 128
Coarse material, use in stabilization of bases of tar surface treated roads	2, 3, 20
Codes standardizing highway signs and signals	109, 110, 122
Cohesion in soils	2, 14-19, 184
Coker, E. G.	108
Collection and administration costs:	
of gasoline tax receipts	23, 42, 52, 53, 60
of motor vehicle registration and allied fees	23, 41, 55, 60
Colloid contents of soils:	
as affecting:	
properties of soils	14-16, 182-184
rate of sedimentation of soils	98, 103
viscosity of suspending medium in sedimentation tests of soils	98
as indicated by liquid limit and shrinkage limit	183, 184
test results for various soils	4, 5, 95, 104
"Composite mile" of road, cost index	56, 81-92
Compressive strength:	
of cement mortar specimens as affected by curing method	106-108
of concrete slabs as affected by—	
delayed finishing	130, 131, 145, 147-154
vibration	130, 131, 136-140, 154
Compressive stresses in concrete pavement slabs	185-187
Concrete:	
structural concrete, cost index data	81, 83-87, 90, 91
tests—	
cotton mat curing tests	73-80, 92
effect of vibration and delayed finishing on slabs	129-154
structural tests of concrete pavements, analytical tools for judging results of, a	185-188
<i>see also</i> headings beginning Concrete, Curing.	
Concrete arch construction, Freyssinet method	232
Concrete roads:	
finishing methods (standard, vibration, and Johnson methods), comparative results	129-154
in Michigan	63
mileages—	
in Illinois	38, 47
in Wisconsin	22
of Federal-aid concrete pavements built, 1923-31	86
of State highways completed, 1923-31	87
mud jack operations	181-184, 194
place in "composite mile", cost index of highway construction	56, 81-92
Cone method of aggregate voids determination of asphaltic paving mixtures	206, 207
